

Antioxidants as analytes in analytical chemistry

Budnikov G., Ziyatdinova G.

Kazan Federal University, 420008, Kremlevskaya 18, Kazan, Russia

Abstract

Procedures for the determination of individual antioxidants of different nature in biological materials with the use of electrochemical, chromatographic, spectrochemical, and other methods were considered. The main performance characteristics of these procedures are presented. © 2005 Pleiades Publishing, Inc.
